

# IZHNEFTEMASH

IZHEVSK OIL MACHINE-BUILDING PLANT (PJSC) IS ONE OF THE TOP RUSSIAN MANUFACTURERS OF OILFIELD EQUIPMENT FOR OIL AND GAS WELL DRILLING, REPAIR AND COMPLETION, FOR OIL PRODUCTION AND PUMPING.

## GENERAL INFORMATION ABOUT THE COMPANY

- Major product line of the company:
  - Sucker rod pumps;
  - Beam pumping units;
  - Mud pumps;
  - Break-out tongs;
  - Special-purpose equipment for well cementing;
  - Well completion equipment (multistage hydrofrac equipment);
  - ESP variable speed drives and switchboards;
  - Spare parts and tubing couplings;
  - Equipment maintenance.
- Major customer profile: oil producing, drilling and oilfield service companies.
- Production capacity:
  - 10 800 SRPs;
  - 600 beam pumping units;
  - 180 special oilfield machinery units;
  - 180 break-out tongs;
  - 1,6 mln. tubing couplings;
  - 720 ESP control stations.
- Certification: GOST R, ISO-9001, APIQ1, API specifications.

## KEY STRENGTHS / INNOVATION

### ADVANTAGES FOR AN IMPORTER

- We supply our products under our own brand.
- Packaged supply of equipment for oil production and various operations for well construction and servicing.
- Manufacture of over 1000 standard sizes and modifications of sucker rod pumps according to API 11AX, and beam pumping units according to API 11E.
- Availability of key process stages and engineering competencies for equipment design and production, 23 asserted patents.

### ADVANTAGES FOR DISTRIBUTORS AND DISTRIBUTING NETWORKS

- Pricing flexibility.
- Minimum production and delivery time.
- Product customization.
- Supply of spare parts for all manufactured equipment.

## WHAT DIFFERS US FROM OUR CURRENT COMPETITORS IN THE MARKET?

- Significant experience in the market of oilfield equipment.
- Our leadership in the manufacture of oilfield equipment provides for our longstanding partnership with the leading oil companies and service companies.
- Extensive geographical outreach and market penetration.
- End-to-end production cycle.
